

Environmental Policy

version 3 • 4/23/19

We believe in minimizing our own environmental impact, helping our customers to achieve similar goals, and ensuring that our partners are aware of our commitment to **Near-Zero** impact on the environment. We will:

- ✓ **Assess** the environmental interactions of our activities, products and services to identify improvement opportunities;
- ✓ **Control** our processes, procedures, equipment, facilities and activities to prevent pollution and conserve natural resources;
- ✓ **Comply** with environmental regulations and other applicable requirements, both internal and external;
- ✓ **Continually improve** our performance by establishing relevant objectives and measuring our progress.

New Pig team members and our partners understand that achieving **Near-Zero** impact will help us to be profitable, socially responsible and protect the environment for future generations.
