

# PIG Carpet Protection Runner with Adhesive Backing

## Frequently Asked Questions

---

**Q: How do I clean the PIG Carpet Protection Runner?**

A: We recommend vacuuming the runner daily. To deep clean and remove stains, use a carpet extractor on top of the runner.

**Q: Can I use the runner on stairs?**

A: No. The runner is not intended to be used on stairs.

**Q: How can I tell when the runner needs changing?**

A: As long as your carpet runner shows no sign of obvious wear and maintains a good bond with the base carpet, you can leave it in place for 3–6 months. We recommend inspecting the runner periodically for any signs of excessive wear and to make sure the edges are maintaining a good bond. If the corners have lost some adhesion, you can trim the runner or replace it.

**Q: Will the runner discolor or damage my carpet?**

A: No, the runner itself won't discolor the carpet. However, since the runner protects the surface underneath, the surrounding carpet may appear soiled, develop wear patterns from foot traffic or fade from exposure to UV light.

**Q: What types of surfaces does the Carpet Protection Runner work on?**

A: The Carpet Protection Runner is designed to work on most common commercial carpets. We don't recommend using the runner on hard floors or residential carpets.

**Q: Do I need to prepare my carpet before I install the Carpet Protection Runner?**

A: Yes. For best results, your carpet should be clean and dry. Vacuum thoroughly to remove dirt and debris. Remove oily stains with a commercial carpet extractor.

**Q: Will the Carpet Protection Runner stick to severely worn or stained carpet?**

A: Yes, the runner will adhere to most commercial carpets regardless of stains or wear. However, we recommend deep cleaning them with a commercial carpet extractor to remove oily stains before installing. This will ensure proper adhesion and better performance.

**Q: If my carpet feels tacky after I pull up the runner, how do I remove it?**

A: All adhesive-backed mats have the potential to leave residue. After you pull up the runner, clean the carpet with a commercial floor extractor to remove any tackiness that may have been left behind. Allow carpet to dry thoroughly before reinstalling.

**Q: Does the Carpet Protection Runner affect my ADA requirements?**

A: No. The runner complies with ADA requirements because it's low profile, provides traction and stays in place.

**Q: Can I use the Carpet Protection Runner outdoors?**

A: No. The runner is intended for indoor use only.
