

# Open-Head Bucket with Built-in Handle

## Packaging Limitations, Closure and Shipping Instructions

---

### Packaging Limitations

1. Bucket must be used with the lid that is provided with the container to meet UN shipping requirements.
2. Gross package weight of bucket and contents may not exceed UN certification markings on container.
3. Do not fill bucket above the top of the container.
4. Bucket is qualified to ship liquids only.
5. Materials placed in bucket must be compatible with polyethylene.

### Closure Instructions

1. Prior to closing place contents in bucket.
2. Make sure top sealing edge of bucket is free from debris, cuts, gouges or other deformities that may affect closure.
3. Ensure that the lid gasket is free of deformities or debris that could affect closure.
4. Using hand force or a rubber mallet, force lid down onto the container body until you hear an audible snapping sound of the lid engaging the container body.
5. Inspect the closed package to verify that the cover is fully seated onto the bucket. Bulging of the cover or sidewall is an indication that the cover has not fully latched. Adjust the downward force as needed or re-cap the package until the cover is fully seated.

### Shipping

1. Do not ship if closure is unsuccessful.
2. It is the shipper's responsibility to pack and ship the bucket in accordance with all applicable transportation regulations.
