

PIG Storm Drain Skimmer Squid

Instructions

The **PIG Storm Drain Skimmer Squid** is designed to work in tandem with a **PIG Storm Drain Filter** (available at newpig.com) for best performance. The Storm Drain Filter captures dirt and sediment, allowing the Squid to stay clean and absorb oil, sheen and fuels more effectively. For drains in areas with minimal dirt and debris, the Squid can be used as a standalone treatment option.

- 1. ATTACH LINE** — Tie the Squid's line to grommet on bottom of Storm Drain Filter (**Fig. A**) or directly to the drain grate (**Fig. B**).
- 2. ADJUST LENGTH** — Adjust the line length so the Squid floats on standing water (if present) or rests at the bottom of the catch basin.
- 3. WAIT FOR RAIN** — With our Squid hanging in your catch basin, floating sheens and hydrocarbons are removed from stormwater runoff before they can be discharged into the environment.
