# Krisis Protection Instructions:

## To limit Condensation inside your Krisis Flood Bag

Condensation can occur over time if Krisis Flood Bags are left for long periods in hot and cold weather conditions.

It is recommended to place Silicone Gel pads inside the flood bag. A Silicia Gel pad will help to control any moisture inside the Krisis Flood Bags over long periods of time. Silicia Gel is an excellent way to control humidity and moisture that may lead to a build-up of mould.

**Flood proof your indoor home contents & business assets  
with Krisis Flood Bags – for content protection.**
