Seal-4 Multi-Purpose Polyurethane Acid-Resistant Adhesive

1. Product and Company Identification
Product Name- Polyurethane Sealant SEAL-4
Product Code – N/A
Recommended Use: One-component, Polyurethane-based moisture curing gun grade sealant.
Manufacturer- ENVIROGUARD
5534 Olive St.
Montclair, CA  91763
http://www.enviroguard.com/
Telephone (General) ● 800-206-9884
Emergency telephone number
CHEMTREC ● 800-424-9300

2. Hazards Identification

Emergency overview
SENSITIZER.
IRRITANT.
Irritating to eyes, respiratory system and skin.
May cause sensitization by inhalation and skin contact.
CONTAINS MATERIAL WHICH MAY CAUSE CANCER.

State of matter: solid
Colour: pigmented
Odour: slight odour

Potential health effects

Acute toxicity:
Of very high toxicity after short-term inhalation. Virtually nontoxic after a single skin contact. Virtually nontoxic after a single ingestion.

Irritation / corrosion:
Irritating to eyes, respiratory system and skin.

Sensitization:
Sensitization after skin contact possible. The substance may cause sensitization of the respiratory tract.
Chronic toxicity:

**Carcinogenicity:** Indication of possible carcinogenic effect in animal tests.

**Repeated dose toxicity:** Prolonged exposure may cause chronic effects. Overexposure may cause CNS depression including headache, dizziness, nausea and loss of consciousness.

**Reproductive toxicity:** The results of animal studies gave no indication of a fertility impairing effect.

**Teratogenicity:** No indications of a developmental toxic / teratogenic effect were seen in animal studies.

**Genotoxicity:** The substance was mutagenic in various bacterial test systems; however, a mutagenic effect could not be confirmed in mammalian cell culture.

**Signs and symptoms of overexposure:**
The most important known symptoms and effects are described in the labelling (see section 2) and/or in section 11.

**Potential environmental effects**

**Aquatic toxicity:**
Acutely harmful for aquatic organisms. May cause long-term adverse effects in the aquatic environment.

**Degradation / environmental fate:**
The product is unstable in water. The elimination data also refer to products of hydrolysis.

### 3. Composition / Information on Ingredients

### 4. First-Aid Measures

**General advice:**
First aid personnel should pay attention to their own safety. Remove contaminated clothing.

**If inhaled:**
If difficulties occur after vapor/aerosol has been inhaled, remove to fresh air and seek medical attention.

**If on skin:**
Wash thoroughly with soap and water. Under no circumstances should organic solvent be used. If irritation develops, seek medical attention.

**If in eyes:**
Wash affected eyes for at least 15 minutes under running water with eyelids held open, consult an eye specialist.

**If swallowed:**
Rinse mouth and then drink plenty of water. Do not induce vomiting unless told to by a poison control center or doctor.

**Note to physician**

**Treatment:** Treat according to symptoms (decontamination, vital functions), no known specific antidote.

---

### 5. Fire-Fighting Measures

**Flash point:** 89 °C (ASTM D3278)

- **Auto ignition:** not applicable
- **Lower explosion limit:** 1 %(V) Information applies to the solvent.
- **Upper explosion limit:** 6 %(V) Information applies to the solvent.
- **Flammability:** not highly flammable

**Suitable extinguishing media:**
- foam, water spray, dry powder, carbon dioxide

**Unsuitable extinguishing media for safety reasons:**
- water jet

**Hazards during fire-fighting:**
- carbon dioxide, carbon monoxide, harmful vapors, nitrogen oxides, fumes/smoke, carbon black

**Protective equipment for fire-fighting:**
- Firefighters should be equipped with self-contained breathing apparatus and turn-out gear.

**Further information:**
- The degree of risk is governed by the burning substance and the fire conditions. Contaminated extinguishing water must be disposed of in accordance with official regulations.

---

### 6. Accidental release measures

**Personal precautions:**
- Use personal protective clothing. Handle in accordance with good building materials hygiene and safety practice.

**Environmental precautions:**
- Contain contaminated water/firefighting water. Do not discharge into drains/surface waters/groundwater.

**Cleanup:**
- For small amounts: Sweep/shovel up. Dispose of absorbed material in accordance with regulations.
- For large amounts: Sweep/shovel up. Dispose of absorbed material in accordance with regulations.

---

### 7. Handling and Storage

**Handling**

**General advice:**
- Avoid skin contact. No special measures necessary provided product is used correctly.

---

Date Created: 6/15/2015
Revision Number: 1
Protection against fire and explosion:
Keep away from sources of ignition - No smoking. The relevant fire protection measures should be noted.

Storage
General advice:
Keep only in the original container in a cool, well-ventilated place. Protect from direct sunlight. Store protected against freezing.

8. Exposure Controls and Personal Protection

**Personal protective equipment**

**Hand protection:**
Chemical resistant protective gloves

**Eye protection:**
Safety glasses with side-shields.

**Body protection:**
Body protection must be chosen based on level of activity and exposure.

**General safety and hygiene measures:**
Avoid contact with the skin, eyes and clothing. No special measures necessary if stored and handled correctly. Handle in accordance with good building materials hygiene and safety practice. When using, do not eat, drink or smoke. Hands and/or face should be washed before breaks and at the end of the shift. At the end of the shift the skin should be cleaned and skin-care agents applied. Gloves must be inspected regularly and prior to each use. Replace if necessary (e.g. pinhole leaks).

### 10. Stability and Reactivity

**Conditions to avoid:**
See MSDS section 7 - Handling and storage.

**Substances to avoid:**
Strong acids, strong bases, strong oxidizing agents

**Hazardous reactions:**
The product is stable if stored and handled as prescribed/indicated.

**Decomposition products:**
No hazardous decomposition products if stored and handled as prescribed/indicated.

**Thermal decomposition:**
No decomposition if stored and handled as prescribed/indicated.

**Oxidizing properties:**
not fire-propagating
11. Toxicological information

**Acute toxicity**

Information on: Stoddard solvent  
Assessment of acute toxicity:  
Aspiration may result in chemical pneumonitis, which may be fatal.

Information on: toluene-2,6-diisocyanate  
Assessment of acute toxicity:  
Of very high toxicity after short-term inhalation. In animal studies the substance is virtually nontoxic after a single ingestion. In animal studies the substance is virtually nontoxic after a single skin contact.

EU-classification

Information on: toluene-2,4-diisocyanate  
Assessment of acute toxicity:  
Of very high toxicity after short-term inhalation. Virtually nontoxic after a single ingestion. Virtually nontoxic after a single skin contact.

**Irritation / corrosion**

Information on: calcium oxide  
Assessment of irritating effects:  
Corrosive! Damages skin and eyes.

Information on: toluene-2,6-diisocyanate  
Assessment of irritating effects:  
Irritating to eyes and skin.

Information on: toluene-2,4-diisocyanate  
Assessment of irritating effects:  
Irritating to eyes and skin.

**Sensitization**

Information on: toluene-2,6-diisocyanate  
Assessment of sensitization:  
The substance may cause sensitization of the respiratory tract. Sensitization after skin contact possible.

Information on: toluene-2,4-diisocyanate  
Assessment of sensitization:  
The substance may cause sensitization of the respiratory tract. Sensitization after skin contact possible.

**Repeated dose toxicity**

Information on: talc

Information on: bis(2-propylheptyl) phthalate  
Assessment of repeated dose toxicity:  
Repeated exposure to high doses of the substance causes reversible liver changes in rodents. According to present knowledge, these effects do not occur in man.

Information on: Stoddard solvent  
Assessment of repeated dose toxicity:  
Overexposure may cause liver and kidney toxicity. Repeated exposures may result in pulmonary congestion.

Information on: toluene-2,4-diisocyanate
Assessment of repeated dose toxicity:
The substance may cause damage to the lung even after repeated inhalation of low doses, as shown in animal studies.

Genetic toxicity

Information on: toluene-2,6-diisocyanate
The substance was mutagenic in various test systems with bacteria and cell cultures; however, these results could not be confirmed in tests with mammals. Literature data.

Information on: toluene-2,4-diisocyanate
The substance was mutagenic in various test systems with bacteria and cell cultures; however, these results could not be confirmed in tests with mammals. Literature data.

Carcinogenicity

Information on: bis(2-propylheptyl) phthalate
In long-term studies in rodents exposed to high doses, a tumorigenic effect was found; however, these results are thought to be due to a rodent-specific liver effect that is not relevant to humans. The product has not been tested. The statement has been derived from products of a similar structure or composition.

Information on: Titanium dioxide
IARC (International Agency for Research on Cancer) has classified this substance as group 2B (The agent is possibly carcinogenic to humans). In long-term studies in rats in which the substance was given by inhalation, a carcinogenic effect was observed. Tumors were only observed in rats after chronic inhalative exposure to high concentrations which caused sustained lung inflammation. In long-term studies in rats and mice in which the substance was given by feed, a carcinogenic effect was not observed. Dermal exposure is not expected to be carcinogenic.

Information on: toluene-2,6-diisocyanate
IARC (International Agency for Research on Cancer) has classified this substance as group 2B (The agent is possibly carcinogenic to humans).

Information on: toluene-2,4-diisocyanate
IARC (International Agency for Research on Cancer) has classified this substance as group 2B (The agent is possibly carcinogenic to humans). NTP listed carcinogen

Other Information:

Based on our experience and the information available, no adverse health effects are expected if handled as recommended with suitable precautions for designated uses. The product has not been tested. The statements on toxicity have been derived from the properties of the individual components.

Information on: Stoddard solvent
In tests with mammals a central nervous system disorder was observed.

----------------------------------

12. Ecological Information

Degradability / Persistence
Biological / Abiological Degradation

Evaluation: Poorly biodegradable.

The product is unstable in water. The elimination data also refer to products of hydrolysis.

Other adverse effects:
Acutely harmful for aquatic organisms. Do not discharge product into the environment without control. The product has not been tested. The statements on ecotoxicology have been derived from the properties of the individual components.

13. Disposal considerations

Waste disposal of substance:
Dispose of in accordance with local authority regulations. Do not discharge into drains/surface waters/groundwater.

14. Transport Information

Land transport
TDG
Not classified as a dangerous good under transport regulations

Sea transport
IMDG
Not classified as a dangerous good under transport regulations
15. Regulatory Information

**Federal Regulations**

**Registration status:**
Chemical DSL, CA released; restriction on use / not listed

CEPA, Significant New Activity Restriction (SNAc)
Not for use in products designed to be used by children under the age of 7.
SNAc 12541

**WHMIS classification:**
- B3: Combustible Liquid
- D2A: Materials Causing Other Toxic Effects - Very toxic material

**THIS PRODUCT HAS BEEN CLASSIFIED IN ACCORDANCE WITH THE HAZARD CRITERIA OF THE CPR AND THE SDS CONTAINS ALL THE INFORMATION REQUIRED BY THE CPR.**
