PIG® Leak Diverter for Pipes-Horizontal
TLS147

STEP 1

Install hose adapter.
Note: refer to additional instructional sheet for further instructions if needed.

STEP 2

Open and pull apart flap of horizontal diverter hook and loop closure.

STEP 3

Wrap flap over top of leaking pipe area making sure drain and attached hose is on the bottom facing down.

STEP 4

Starting at top corner, re-align flap to mating hook and loop closure on sides and attach. Repeat other side.

STEP 5

Once sides are secured, continue to close all hook and loop closures until unit fits snug to pipe.

STEP 6

Make sure unit is center on the leak.

NOTES:

- Limited chemical resistance.
- Not suitable for temperatures over 190 degrees F.
- PIG® Diverter will divert up to 3.33 gallons of liquid per minute when used with a ½" ID hose.

STEP 7

Position hose in drain or drain receptacle.
