

CLEAN UP BATTERY ACID SPILLS SAFELY

NEW PIG'S STEP-BY-STEP PROCESS

1

Isolate the area, extinguish any open flames and turn off the charger.

2

Remove all metal jewelry and tools from the area.

3

Don appropriate PPE.
(goggles, face shield, apron, gloves)

4

Use absorbents to contain the spill.

 Absorbent Sock

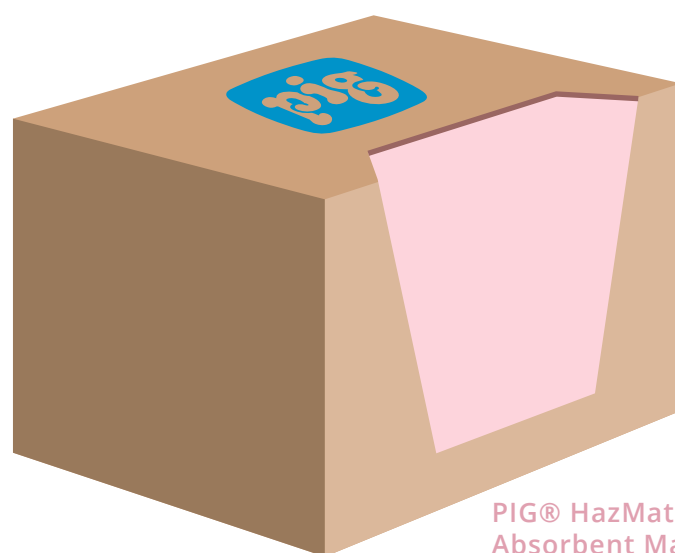

5

Use absorbents or neutralizers to soak up spilled electrolyte.

Neutralizers will turn from

_____ to _____
(color) (color)

when the spill has been neutralized.

PIG® HazMat Chemical Absorbent Mat Pad

6

Sweep up any loose absorbents and neutralizers and place all spent materials in disposal bags or containers.

7

Report the spill to

_____ so that supplies can be restocked.
