

# COMPLY OR CRY:

## 6 EPA Regs You Can't Afford to Ignore

# 1

### Stormwater 40 CFR 122

**Regulates discharges to prevent stormwater from washing pollutants into local surface waters such as streams, rivers, lakes or coastal waters.**

**What it means to you:** If you must comply, you need a discharge permit and a plan that describes how you will control and prevent illegal discharges.

**Why you'll cry:** Fines range from \$5,000–\$50,000 per day.

**Help to comply:**

PIG DrainBlocker Drain Cover (PLR403) seals drains tight for quick spill response or long-term, outdoor deployment. Cost: \$421

# 2

### SPCC 40 CFR 112.3

**Regulated facilities with above-ground oil storage capacity greater than 1,320 gal. or underground storage capacity greater than 42,000 gal. are required to have written, site-specific spill plans.**

**What it means to you:** If you have bulk oil storage at your facility that falls under the regulation, you need to write and implement a Spill Prevention Control & Countermeasure (SPCC) Plan.

**Why you'll cry:** Fines for SPCC violations have ranged from \$500–\$200,000.

**Help to comply:**

PIG Spill Kit in 95-Gallon Overpack (KIT202) is a key component for your spill plan. Cost: \$622

# 3

### 40 CFR 264.173

**Containers must be closed except when adding or removing hazardous waste.**

**What it means to you:** If you're using a drum to collect hazardous waste, you can't take the drum lid off and not put it back on properly.

**Why you'll cry:** Penalties of up to \$25,000 per day.

**Help to comply:**

PIG Latching Drum Lid (DRM659) has a unique design that makes it easier to access the drum, minimize vapor emissions and meet haz-waste regulations. Cost: \$299

# 4

### 40 CFR 264.1086(c)

**Containers must be equipped with a cover and closure devices that form a continuous barrier with no visible holds, gaps or other open spaces to the interior of the container.**

**What it means to you:** Containers storing VOC-containing liquids must be kept closed to minimize vapor emissions when liquids are not being transferred.

**Why you'll cry:** Penalties of up to \$25,000 per day.

**Help to comply:**

PIG Burpless Drum Funnel (DRM1125) lid seals completely to help reduce vapor emissions. Cost: \$269

# 5

### 40 CFR 264.175

**Secondary containment is required for all containers of hazardous waste.**

**What it means to you:** If a primary container holding hazardous material fails, or if any material leaks from that container, you must have a secondary containment measure in place to avoid a release.

**Why you'll cry:** Failure to comply through negligence can result in fines of up to \$25,000 per day.

**Help to comply:**

PIG Poly Spill Containment Pallet (PAK210) helps you secure hazardous liquids in drums with a molded-in sump that catches leaks and spills. Cost: \$335

# 6

### SPCC 40 CFR 112.7

**You must have appropriate spill control and countermeasures in place and provide containment and/or diversionary structures or equipment to prevent a discharge of oil.**

**What it means to you:** You must prevent oil spills from getting into the environment.

**Why you'll cry:** Penalty of up to \$1,000 per barrel for uncontrolled oil spills.

**Help to comply:**

PIG Build-A-Berm Barrier (PLR222) lets you construct a semi-permanent, high-visibility spill barrier that's exactly the size and shape you need, indoors or out. Cost: \$710
