

This product contains no GHS hazards and are therefore exempt from OSHA Hazard Communications Regulations for Safety Data Sheets.

Technical Data Sheet: TDS-1007

Product Identifier: PIG® Microbial Oil-Water Separator Remediator (CLN941, CLN942)

**General Use**: PIG® Microbial Oil-Water Separator Remediator is designed to be used in oil-water separators to significantly reduce hydrocarbon contamination in these separators thereby reducing the high cost of disposal and transportation.

## Composition:

CAS: 7732-18-5 Water 88-91%
CAS: 132778-08-6 Alkyl Polyglucoside C9-11 4-7%
CAS: NA Bacterial Cultures 4-6%

**Storage Recommendations**: Store sealed in a cool, dry environment. Avoid long-term contact with direct or reflected sunlight or other sources of UV light, such as high- intensity lighting. Do not freeze. Do not exceed 130°F.

**Shelf Life**: ~2 years, in original sealed container, provided Storage Recommendations are observed. Once opened and mixed, shelf-life is 30 days if lid is tightly sealed.

## Personal Protective Equipment (PPE):

Gloves: Plastic or Rubber gloves.

Eyes: Safety goggles or glasses with side shields

Fire Control Measures: Unused Form: Product is water-based and will not support a flame

## **Physical Properties:**

pH: 6.9-7.2 (concentrated); 6.9-7.5 (Diluted)

Freezing Point: 32° F (0° C) Initial Boiling Point and Range: 212° F (100° C)

Flash Point: Not Available Method: Not available

Solubility in Water (25°C): Complete
Auto-ignition Temperature: Not determined

## Stability & Reactivity:

Conditions of Reactivity: None Known

Incompatible Materials: Strong oxidizers & Strong Acids

Conditions to Avoid: Do not freeze or expose to temperatures over 130°F (54°C) these temperatures

pose no hazard but are not compatible with this product.

Hazardous Decomposition: Not established

**Waste Disposal:** This material is NOT defined as hazardous by the Resource Conservation and Recovery Act. It is the product user's responsibility to determine at the time of disposal whether a material containing the product or derived from the product should be classified as a hazardous waste.
