

Technical Data Sheet

This product contains no GHS hazards and are therefore exempt from OSHA Hazard Communications Regulations for Safety Data Sheets.

Technical Data Sheet: TDS-1011

Product Identifier: PIG® Microbial Oil Remediator for Bilges (CLN960, CLN961)

General Use: PIG® Microbial Oil Remediator for Bilges is designed for recreational boat owners to clean their bilges to be free of hydrocarbons, and reduce odors.

Composition:

CAS: NA	Bacterial Cultures	>4 - <6%
CAS: 132778-08-6	Alkylpolyglycoside C9-11	>4 - <7%
CAS: 7732-18-5	Water	>88- <91%

Storage Recommendations: Store sealed in original container in a cool, dry temperature-controlled environment. Avoid long-term contact with direct or reflected sunlight or other sources of UV light, such as high- intensity lighting before use.

Shelf Life: 2-years unopened, 30 days once mixed, provided Storage Recommendations are observed.

Personal Protective Equipment (PPE):

Gloves: cloth, canvas, leather, or rubber gloves are recommended and as a good industrial practice.
Eyes: Safety goggles or glasses with side shields recommended and as a good industrial practice.

Fire Control Measures: Unused Form: Not Applicable
Used Form: Not Applicable

Physical Properties:

pH:	6.9 to 7.2
Freezing Point:	32°F
Initial Boiling Point and Range:	212°F
Flash Point: Not Applicable	Method: Not Applicable
Relative Density (H ₂ O = 1):	1.00 +/- 0.1
Solubility in Water (25°C):	Completely soluble
Auto-ignition Temperature:	Not Applicable

Stability & Reactivity:

Conditions of Reactivity:	None
Incompatible Materials:	High Heat
Conditions to Avoid:	High Temperatures over 150°F
Hazardous Decomposition:	None

Waste Disposal: This material is NOT defined as hazardous by the Resource Conservation and Recovery Act. It is the product user's responsibility to determine at the time of disposal whether a material containing the product or derived from the product should be classified as a hazardous waste.
