

Technical Data Sheet

This product contains no GHS hazards and are therefore exempt from OSHA Hazard Communications Regulations for Safety Data Sheets.

Technical Data Sheet: TDS-246

Product Identifier: PIG® Sediment Filter Sock (FLT786, FLT787)

General Use: PIG® Sediment Filter Sock is designed to help with erosion control, storm water runoff and sediment control around property perimeters. This ensures Best Management Practices (BMPs) for Sediment Control Applications. The Sediment Filter Sock allows water to pass through as it removes TSS, sediment, trash and debris from storm water runoff.

Composition:

CAS: 9003-07-0 Polypropylene (skin)
CAS: None Organic Compost (Kiln-Dried Soft & Hardwoods) (Filler)

Storage Recommendations: Store in a cool, dry environment. Avoid long-term contact with direct or reflected sunlight or other sources of UV light, such as high- intensity lighting.

Shelf Life: Indefinitely, provided Storage Recommendations are observed.

Personal Protective Equipment (PPE):

Gloves: cloth, canvas, leather, or rubber gloves are recommended for extended use and as a good industrial practice.
Eyes: Safety goggles or glasses with side shields as a good industrial practice

Fire Control Measures: Unused Form: Water, Foam, or carbon dioxide
Used Form: Extinguishing agents appropriate for absorbed liquid

Physical Properties:

pH: Not Applicable
Melting Point: 328°F / 164°C (Skin)
Initial Boiling Point and Range: Not Applicable
Flash Point: Not Available Method: Not Applicable
Relative Density (H₂O = 1): 0.905 (Skin)
Solubility in Water (25°C): Practically Insoluble
Auto-ignition Temperature: Not Determined
Maximum Working Temperature Not Determined

Stability & Reactivity:

Conditions of Reactivity: Not reactive under normal conditions
Incompatible Materials: Strong oxidizing agents, Acids and Bases
Conditions to Avoid: Incompatible materials
Hazardous Decomposition: Not Determined

Waste Disposal: This material is NOT defined as hazardous by the Resource Conservation and Recovery Act. It is the product user's responsibility to determine at the time of disposal whether a material containing the product or derived from the product should be classified as a hazardous waste.

Revision 04.17.2024 (Removal of gravel – no longer contains crystalline silica)
